Profile

I'm a BCA student with a strong foundation in programming and web development, experienced in both front-end and back-end technologies with intermediate skills in Java and Python. I've built full-stack project named Paw-Pal, a veterinary appointment system, a React + Firebase version with role-based dashboards. I'm a fast learner, always eager to explore new technologies and grow in the fields of software development and fintech.

Projects

I developed Paw-Pal, a comprehensive full-stack veterinary appointment booking system designed to connect pet owners with veterinarians efficiently. The platform features role-based authentication and dashboards for users, doctors, and admins, enabling seamless appointment scheduling, approval workflows, and doctor management. Built using React for the front end and Firebase for real-time database and authentication services, the application incorporates responsive design with Tailwind CSS to ensure a smooth user experience across devices. This project allowed me to deepen my skills in modern web development, user authentication, and real-time data handling.

Education

July 2020

10th Passed With 75%

St Aloysius Convent ISC school, Palluruthy.

July 2022

12th Passed With 69%

St Aloysius Convent ISC school, Palluruthy.

May 2025

BCA Passed with 5.39 CCPA

Siena College of Professional Studies,
Edakochi.

Key skills and characteristics

- React - Basic
- SQL - Basic
- PHP - Basic
- CSS - Intermediate
- HTML- Intermediate
- JAVA- Intermediate
